Biogas Technology Pavilion Makes Debut at Livestock Taiwan Expo & Forum on July 26

The 2nd edition of Livestock Taiwan Expo & Forum will take place at Taipei World Trade Center from July 26-28. The 2017 debut brought a big success and won the local authority, Council of Agriculture's, fully support for two consecutive years of the upcoming trade show. The organiser, UBM Taiwan, is recruiting suppliers from around the world and will expand the exhibition scale to present more products. Featuring innovative, eco-friendly and sustainable technology and merchandise, Livestock Taiwan Expo & Forum positions itself as a one-stop international B2B trading platform to highlight the specialty of the livestock niche market.

UBM Taiwan believes that the Southeast Asia governments' investment and promotion on biomass and biogas energy have created wide commercial possibilities and expanded the swine business. As a result, a biogas technology pavilion is planned to meet Asia-pacific countries' renewable energy policy. Anaerobic fermentation technologies, biogas desulphurization and dehydration systems, biogas power generators, and plant planners introduced by manufacturers and vendors of Thailand, Vietnam and Malaysia are the targeted items to showcase.

In order to draw effective buyers, UBM Taiwan is releasing the accommodation subsidy program to perk up the livestock market in Taiwan. The business deal of biogas facilities will generate about \$12 million US dollars and extend peripheral eco-green products' aggressive buying. The total gross merchandise volume of Livestock Taiwan Expo & Forum will be tripled in 2018, UBM Taiwan says.

Outstripping the perspective of biogas energy, animal healthcare and vaccine products will be in the spotlight at the trade show. Receiving eager enquiries from overseas buyers, UBM Taiwan encourages exhibitors to bring in more products including the latest animal medicine and drugs, feed and feed additives and the services for animal diagnosis technology.

"Livestock Taiwan Expo & Forum builds the bridge between manufacturers and buyers for the animal healthcare industry. It is an annual grand trade show to provide a professional platform in guiding market strategies and a good path in exploring international business," Lee Hsien-Te, the Chairman of Taiwan Veterinary Medicine & Health Industry Association said. The exhibitors showcase animal healthcare products include Tafong Pharmaceutical, San Heh Pharmaceutical, Spiregene Biotech Healthcare (Sintong Animal), Vetnostrum Animal Health, Kanvergen Inc., Synbio Tech Inc., Spring Wisdom, More Standing, More Wsee, Life Rainbow Biotech, Nice Garden Industrial and so on.

The Livestock Taiwan Expo & Forum 2018 is held concurrently with Aquaculture Taiwan Expo & Forum and Asia Agri-Tech Expo & Forum. At present, the number of exhibitors has exceeded 2017's debut and more than 2,000 sqm has been taken. UBM Taiwan will recruit more suppliers to introduce biogas equipment and animal healthcare products before June.
